SUMMARY

I am a Full Stack AI Python Developer with **6 +** years of experience specializing in software development, particularly in Python and Full Stack AI Development and Digital Transformation Consultant with 5 years Generative AI, Deep Learning, and AI Agents, delivering strategic and scalable solutions across manufacturing, financial services, automotive, and health care sectors and Iris detection highly accurate, contactless biometric technology and shaping AI-led operating models.

Experienced in building predictive maintenance systems, anomaly detection frameworks, intelligent automation workflows, and enterprise GenAI platforms that accelerate decision-making and operational efficiency.

Recognized for bridging consulting, technology,

EXPERIENCE 5.5 + YEAR's

AI Engineer

IonIdea Interactive Pvt Ltd (AI Engineer) whitefield bangaluru 560056.

BRS-ERP-PlacementModule ,PRD business requirements chatbot. Langchain & langraph,postgresql,Ollama model.

Packaged app development lead.

Accenture Solutions Pvt. Ltd .

Professional services company specializing in consulting and technology Leading packaged app development using Python and LLM business chain requirement chatbot with N8N agentic automate and e-commerce website using computer vision Implemented LangChain and vector database embedding with LLMs

- ..

Python Developer 03/2023-08-2024

MDP Infra Pvt. Ltd. (Client: MPMKVVCL) Bhopal, India Technology solutions for utility management Developed secure chat proxy hosting and multi- factor authentication (MFA) API with Azure,OCR AI visualization.

Built Django-based systems with PostgreSQL, ReactJS, and REST APIs Automated invoice generation and structured inspection of electrical materials

- ..

Python Developer

Mosphe 12/2021 - 01/2023 Indore, India

IT solutions provider

Health Care based multipredicted iris detection

- Developed ERP shopping web applications and university management systems.
- Implemented GraphQL schema with REST APIs and ReactJS.
- Created OCR-based projects for precise decimal text recognition.

Python Developer

Signimus Technologies Pvt. Ltd 02/2015 - 10/2018 Indore, India

Technology and data services

Banking orgainization pvt ltd.

Loan approval prediction

- Web scraping and data extraction using BeautifulSoup, Pandas, Numpy, and Python.
- Implemented multi-factor authentication with face recognition, QR code, OTP, and speech recognition, and DNN-based face detector (deep learning method).

EDUCATION

M.Tech

Rajiv Gandhi Proudyogiki Vishwavidyalaya(M.I.T)

08/2019 - 12/2021 Indore

Bachelor of Engineering

Rajiv Gandhi Proudyogiki Vishwavidyalaya(V.I.T.S)

04/2009 - 06/2013 Indore

Research in M.tech

International journal of recent technology science & Management

11/2021

A robust load frequency control in two-area power system with help of SCA algorithm Matlab software

KEY ACHIEVEMENTS

Technology Development

Successfully developed multiple ERP web applications that enhanced operational efficiency and AI-powered projects that improve user interaction

SKILLS

Python Pandas Numpy ReactJS

tensorflow SQL MongoDB LLM Langchain

Glue, LLM-based Agents LangGraph AWS

Azure function GCP Docker Kubernetes

FastAPI Pytesseract, Pyspark , Pytorch ,Airflow

Hugging Face SpaCy Keras, Cuda, Linear/Logistic

Regression Clustering Graph Theory Regularizations

Recommender System AgenticAI N8N Automation

Generative Adversial Claude Code ,Databricks, Nvidia GPU (CUDA 13.x)

.

ERP Web Application & AI-based Virtual Fitting Room

12/2021 - 08/2023 India

ERP Web Application & AI-based Virtual Fitting Room

- Range of projects highlighting significant advancements in AI capabilities and secure authentication.
- Developed AI-powered apparel fitting room using computer vision.
- Created an OCR-based system for digital meter reading and automated invoice generation.
- Built a secure multi-factor authentication system using various recognition technologies.
- Executed AI-based data extraction with live proxy using BeautifulSoup.

Core AI & ML

11/2021 IJRTSM(Research)

CIRTIFICATE(UDEMY)

https://www.udemy.com/certificate/UC-045fe37e-1aba-4ed6-9b4a-ebf84afe1953/

- Generative AI, Deep Learning, AI Agents & Autonomous Workflows, Bayesian Modeling (hierarchical inference), Predictive Maintenance & Machine State Classification, Anomaly Detection, Monte Carlo Simulation, RQA, GPU-Accelerated ML, ML Pipelines (Airflow, MLflow, feature stores), Model Deployment, Monitoring, and Auto-Retraining
